

In WA, seafood can travel enormous distances from point of harvest to the plate. It is important to understand this when we talk about:

## FRESH AND FROZEN, LOCAL AND IMPORTED.

**FRESH FISH** is fish that when caught, is put whole into an ice slurry aboard the boat. From here it is processed, (either gutted, gilled and scaled, or filleted) and sold to restaurants without freezing.

**FROZEN FISH** is fish, that when caught, is immediately processed, filleted and snap frozen. This is often done on board the fishing trawler. Otherwise, the process is completed at on shore processing facilities.

**LOCAL FISH** from a Fish Pub perspective is fish caught in West Australian waters. We will use product from interstate when necessary. You will be sure to know if we do.

**IMPORTED FISH** and seafood is essential to meet Australian demand for seafood, a demand which outstrips the supply Australian fisheries can provide. It also offers premium fish at a price point many people can enjoy. The imported product that we use is from reputable West Australian companies and all fish can be traced back to the trawlers that caught the fish. The harvest is snap frozen to the same exacting standards as is locally caught product.

## THE LEGEND OF THE FRIED MICE!

Created in 2002 by our first head chef Eric Howells, these hot little guys have been on our menu ever since. We stuff Mexican jalapenos with cream cheese before they are deep fried in batter. Served with cooling sour cream.

The cousin of the fried mouse is the Smoky Gonzales, created by our current head chef James Costa in 2008. The Gonzales mouse is a chipotle smoked chilli instead of a jalapeno, resulting in a softer texture with fiery smoky flavours.
