

In WA, seafood can travel enormous distances from point of harvest to the plate. It is important to understand this when we talk about:

## Fresh and Frozen, Local and Imported.

**Fresh Fish** is fish that when caught, is put whole into an ice slurry aboard the boat. From here it is processed, (either gutted, gilled and scaled, or filleted) and sold to restaurants without freezing.

**Frozen Fish** is fish, that when caught, is immediately processed, filleted and snap frozen. This is often done on board the fishing trawler. Otherwise, the process is completed at on shore processing facilities.

**Local Fish** from a Fish Pub perspective is fish caught in West Australian waters. We will use product from interstate when necessary. You will be sure to know if we do.

**Imported Fish** and seafood is essential to meet Australian demand for seafood, a demand which outstrips the supply Australian fisheries can provide. It also offers premium fish at a price point many people can enjoy.

The imported product that we use is from reputable West Australian companies and all fish can be traced back to the trawlers that caught the fish. The harvest is snap frozen to the same exacting standards as is locally caught product.

## Fresh Oysters

Always fresh, we source oysters from Australia's finest lease areas including Ceduna, Smoky Bay, Coffin Bay, various Tasmanian areas and sometimes Albany & Sydney. The provenance of the oysters is dictated by mother nature herself so check with a staff member as to the origin of today's oysters.

## The Legend Of The Fried Mice!

The Classic fried mouse is where we stuff jalapenos with cream cheese before deep frying in batter. Served with cooling sour cream

The Gonzales mouse is a chipotle smoked chilli instead of a jalapeno resulting in a softer texture with fiery smoky flavours.
